

Mixed Media View Finder

When incorporating mixed media from a journal (8"x11" or larger), it is helpful to use a "view finder." By moving the cut out over the mixed media work, you can locate the best sample for your scrapbook page or card.

In our June lesson, we use a 5"x7" cut out for the 6"x9" scrapbook page, and 5"x4" for the card. Simply print on cardstock, cut out the inside of the shapes, and move the square around your mixed media piece until you find the perfect composition!
